

Miray Sönmez

ABOUT ME

I graduated from Ankara University, Department of Sociology, and after my work experiences in various sectors, I decided that software was the field that complemented me. Currently, I want to continue my career as a Frontend Developer and Software Test Engineer. I am experienced in modern JavaScript frameworks such as NextJS and Angular and am passionate about developing user-friendly, scalable web applications. Additionally, thanks to the Software Testing and Quality Assurance training I received, I gained competence in Jira-Xray, Python-Selenium, Postman API tests. I am willing to improve myself in these areas.

EXPERIENCE

In Silico Commerce & Software Development, Ankara — Frontend Developer

Nov2023 - Mar2024 /Freelance

- Collaboration with the backend using .Net and SQL
- Utilize Angular framework and Angular Material, SCSS to create dynamic and responsive user interfaces, enhancing the overall user experience.
- Creating the design aspects of the project with Figma to translate design specifications into functional and visually appealing front-end components.
- Engaging in the planning and architecture phases of the project, ensuring alignment with business goals and technical requirements.

Royal Apps, Remote-US — Frontend Developer

Mar 2023 - Apr 2023 /Full Time

- Leading the UX/UI design and frontend development of two Shopify-integrated apps within a one-month period, achieving a significant 70% progress rate.
- Used React.js and Polaris on the frontend.
- Collaborated with backend developer via PHP

Turkcell Global Bilgi, Ankara — Customer Representative

Sep 2018 - Sep 2020 /Full Time

- Successfully transitioned from inbound call responsibilities to handling back office files and addressing customer complaints.
- Elevated the quality of responses to customer complaints, resulting in a role transition to the objection department.
- Provided detailed and effective responses to customer objections, contributing to increased customer satisfaction and positive feedback.
